STORE FULFILLMENT

Efficient stock management for distribution to physical shops

The Store Fulfillment module has been designed for companies that need real-time control over inventory of their warehouse and physical shops. Additionally, it syncs supply operations throughout the distribution network such as picking, replenishment, transfers between shops and returns.

Best-in-class features of Store Fulfillment

- | | |
|--|---|
| <ul style="list-style-type: none"> ① WMS integration with point of sale (POS) terminals ② Automatic replenishment of shop items depending on stock level ③ Task generation after an in-shop sale or return ④ Transfers of in-warehouse items to shops or between shops | <ul style="list-style-type: none"> ⑤ Warehouse management with cash-and-carry model ⑥ Quick in-shop stock counts ⑦ Coordinated counts between different operators ⑧ Automatic reports (stock level by shop or stock on the way, etc.) |
|--|---|

What benefits does it provide?

Inventory always updated in warehouse and shops	Coordinated transfers between shops
Stockouts eliminated in shops	Efficient customer returns management
Task synchronisation between warehouse and shops	End-to-end distribution visibility in real-time

Logistics process of the Store Fulfillment module

*Minimum Level of Stock

Store Fulfillment adapts to different shop types

Independent shops

A distribution centre serves one or more shops in different geographical locations. Shops are replenished with goods available in the distribution centre. The system controls returns and transfers between shops.

Shop incorporated in the warehouse with picking done for customers

Customers pick the products they need from the shelves and pay at the counter. In this case, the shop and warehouse inventory are managed separately.

Shop incorporated in a warehouse with picking done by staff

Customers order the products they need at the shop counter. Then, operators are responsible for locating them in the warehouse. Once the sale is made, the system updates the inventory automatically.

Why rely on Mecalux Software Solutions?

The company has 50 years of experience in software solutions and a presence in over 70 countries.

More than 370 engineers are exclusively dedicated to the development of logistics and supply chain software.

Over 1,000 installations in 36 countries are managed by Mecalux software solutions.

Software is continuously developed and updated, thanks to major investments in R&D.
